ABOUT YOUR **BRAND**

Who **&** What we do?

Digital Infomedia Solution is an Organization to get extra mileage in promoting their messages products & services across the globe. Webcasting is the live broadcasting of video and audio via the Internet or Intranet. The advantage of a webcast is that it can also be watched or listened to later online by anyone who missed the live broadcast. Company Webcast makes a distinction between three types of webcasts: video webcast, audio webcast or a conference call webcast. Our services consist of an event webcast, a webcast subscription, a company network webcast, video production and webcast consultancy. A webcast is often combined with additional features such as PowerPoint slides, agenda items, appendices, questions, polls, chats etc.

Digital Infomedia Solution is made up of a team of 35 people started in 2006 we have spent 11 years of quality service in the Digital space since we began in 2006. Varied IT segment experience of our people forms the core pillar of our offerings.

Digital Infomedia Solution offers business presentation design service to promote your business or services to the potential buyers. Our presentation design service covers flash presentation design, CD presentation for businesses, corporates, educational organisations and trainers. These presentations could include Power Point presentations, CD Presentations, Flash presentations and websites.

Digital Infomedia Solution maintain a customer centric approach and exhibit know-how in many areas of the evolving digital arena however webcasting is our forte. More than 5000 Live Streaming Successfully done.

UNDERSTANDING COCHLEAR IMPLANTS

— Dr. Asha Agarwal

How a Cochlear Implant works

- 1 Sounds are picked up by the microphone.
- 2 The signal is then "coded" (turned into a special pattern of electrical pulses).
- 3 The implant sends a pattern of electrical pulses to the electrodes in the cochlea.
- 4 These pulses are sent to the coil and are then transmitted across the skin to the implant.
- 5 The auditory nerve picks up these electrical pulses and sends them to the brain. The brain recognizes these signals as sound.

JC CAFE

A Coffee House which aims at serving you the best.

Talking about Coffee, modern day Ethiopia is known for its first usage of this iconic beverage. However neither where coffee was first cultivated nor direct evidence of its prior consumption to the 15th century have been found. Sufi monasteries in Yemen employed coffee as an aid to concentration during prayers. Coffee later spread to the Levant and Persia in the early 16th century; it caused some controversy on whether it was halal in Ottoman and Mamluk society.
